DETAILED ACTION

The response filed April 17, 2001 has been entered.

The Declaration by Dr. Samir Bejar filed April 17, 2001 has been entered.

Claims 13, 15-17 and 22 are pending.

Oath/Declaration

The spelling of the first inventor's name in the Declaration is different from the spelling thereof in the publications.

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

The full name of Dr. Karima Srih-Belguith has not been set forth correctly. The last name is spelled out as "Belghuith".

Claim Rejections - 35 USC § 102

Claims 13 and 15 are rejected under 35 U.S.C. 102(a) as being anticipated by Belghith-Srih.

The rejection is maintained for the reasons of record.

Art Unit: 1652

Claims 13, 15-17 and 22 rejected under 35 U.S.C. 102(b) as being anticipated by Belghith et al.

The rejection is maintained for the reasons of record.

Claim Rejections - 35 USC § 103

Claims 15-17 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Belghith-Srih.

The rejection is maintained for the reasons of record.

Response to Arguments

Applicant's arguments filed April 17, 2001 have been fully considered but they are not persuasive.

In their Remarks as well as in the Declaration by Dr. Samir Bejar Applicants confirm that *Streptomyces* sp. SK has become publicly available on February 1, 1999.

The nucleotide sequence of GenBank accession Y15518 that is 100% identical to SEQ ID NO:1 of the instant invention has become publicly available on February 1, 1999 as well.

February 1, 1999 is prior to a filing date of both the instant application (August 26, 1999) and the prior foreign application (May 26, 1999).

Art Unit: 1652

Applicants argue that "Belguith et al. does not teach or suggest the claimed invention because the disclosure of an isolated nucleic acid, without any sequence information, does not provide an artisan with the reasonable expectation of obtaining the claimed DNA sequences when no information is provided about where such DNA sequence could be obtained or isolated from" (page 2, penultimate paragraph, emphasis added). However, in the instant case the information is provided about where such DNA sequence could be obtained or isolated from. The source was known and publicly available prior to the filing date of both the instant application and the prior foreign application. Belghith et al. describe the DNA from the same source, with the same restriction map, encoding an enzyme with the same properties and having the same name as the enzyme and the encoding DNA of the instant invention. The DNA sequences are inherent to the disclosed clone. Mere sequencing of the clone does not impart the patentability to the nucleotide sequences thereof.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 1652

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
